

NWS Glasgow 2010 Skywarn Training Schedule

Attend this free training, and learn about severe weather, how thunderstorms form, and how to stay safe during hazardous weather. This is a great program for weather enthusiasts, students, and those who have weather safety considerations in their day to day jobs, (outdoor work, public safety etc). Being a Skywarn spotter allows for you to be more aware of the weather around, while providing critical information to the National Weather Service that will help your community.
